

The process of safe referral of international patient

The legal expert of the center signs a cooperation contract with other treatment and diagnostic centers for the referral of patients

The IPD team admits the health tourist to the IPD unit and begins treatments

Is the patient introduced to the center by a facilitating company?

The treating doctor orders the referral of the international patient

The nursing personnel informs the IPD expert about the referral of the international patient

The supervisor coordinates with the intended treatment center for the referral of the international patient

The supervisor takes the needed actions to transfer the international patient

The treating doctor completes the referral form of the international patient and informs the IPD doctor

The IPD nurse accompanies the patient during his/her referral to other centers until he/she gets back to the hospital's IPD unit

The treatment of the international patient continues in the IPD unit
