

International patients' scheduling process

Patient refers to the center and the guards guide him/her to the specialized clinics

The admission unit gives the patient the needed information about doctors and their visit schedule

Is the intended doctor in the center?

NO

YES

The patient applies for a visit by one of the doctors in the center and the admission unit guides him/ her to the payments unit to pay the bills

The intended doctor is not in the hospital and the admission unit gives him/ her further information on the visit schedules of the clinic and the intended doctor

The doctor visits the patient and the required therapeutic services are offered to him/her based on the doctor's orders

If the patient needs surgery, he/she is hospitalized by the doctor's order

The patient refers to the admission unit with the doctor's order to open a medical file

The admission unit admits the patient to the inpatient wards based on the list

In all of the stages, the IPD expert accompanies the international patient.
